

# Creating an Amazon Developer Account

This document will show you how to create and activate an **Amazon Developer Account**. You will need this account before you can start programming using MIT App Inventor's **Conversational AI Interface**. This is the account where you will store all the skills you create. You will then be able to use any of your skills with any Alexa-enabled Amazon devices that are linked to your Amazon account.

## Create a Customer Amazon Account

Before we begin, we need to have a customer Amazon account (the same one you use to shop on Amazon). If you already have a customer Amazon account, then you can skip to the next step.

To create a new account, navigate to <https://www.amazon.com/> and in the top right of the screen, hover your mouse over **Accounts & Lists** and select **Start here** to create an Amazon Account.

Once you do, you'll be taken to a menu where you can create your Amazon account. Follow the on-screen instructions to finish creating your customer Amazon account.

## Activate Your Amazon Developer Account

Once you have successfully created your customer Amazon account, you will need to go to the Amazon Development Console to activate your **Amazon Developer account**. Essentially, you are just telling Amazon that you want to program on Alexa using your customer account.

To do so, navigate to: <https://developer.amazon.com/alexa/console/ask>. You should then see a login screen. Enter your customer Amazon account details.

## Enter Your Profile Information

Once you've logged in, you will be taken to the **Registration** page. Fill in all of the fields with the red star to the side. If you agree to the terms, select the checkbox under **Amazon Developer Services Agreement** at the bottom of the page, and then click Submit to complete your account.

### Sign up to . . .

- Publish your apps and skills across millions of devices in over 236 countries and territories.
- Build for natural voice experiences.
- Start generating revenue in a whole new way with Amazon's unique services and APIs.

## Amazon Developer Registration

### Developer details

First name *	<input type="text" value="Vik"/>
Last name *	<input type="text" value="Enter your last name"/>
Country / Region *	<input type="text" value="Select your country"/>
Developer / Company name *	<input type="text" value="Enter your developer/company name"/>
Phone number *	<input type="text" value="Enter your phone number"/>

## Finish!

Once you click **Submit**, you should see the following webpage. We have now finished creating your Amazon Developer Account. We can finally begin using the MIT App Inventor Alexa Skills Interface.
